Customer Problem Statement Canvas

 **I AM**

Farmers, agronomists, and small landholders who need reliable crop selection guidance.

 **I'M TRYING TO**

Choose the crop that will grow best and yield the most on their land, right now.

 **BUT**

Crop selection is often based on habit or guesswork rather than actual soil and climate conditions.

 **BECAUSE**

Manual soil-report interpretation, lack of real-time data analysis, and limited agronomic expertise cause poor crop choices.

How This Makes Them Feel

Emotional Impact

Uncertain and financially exposed to crop failure.

Problem Statements

ID	I AM (CUSTOMER)	I'M TRYING TO	BUT	BECAUSE	WHICH MAKES ME FEEL
PS-1	a farmer	pick the right crop for my land	I don't know which crop suits my soil and climate	manual assessment and lack of data-driven tools	uncertain and worried about yield
PS-2	an agricultural advisor	recommend crops accurately to many farmers	there are too many soil/climate combinations to assess manually	data is scattered and verification is done manually	overwhelmed and pressured to give correct advice
