

PROJECT DEMONSTRATION

 Communication Plan

 **DATE**
17 7/9/2026

 **NAME**
K.Hemanth Kumar

 **PROJECT**
**OptiCrop – Smart
Agricultural
Production
Optimization Engine**

 **MAX MARKS**
1 Marks

 Overview

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

 Communication Plan

TYPE	FREQUENCY	CHANNEL / TOOL	PARTICIPANTS	PURPOSE
Project Planning	Daily	Personal Notes, VS Code	Self	Plan daily development tasks
Progress Review	Weekly	GitHub, VS Code	Self	Review completed modules and pending work
Issue / Bug Resolution	As Needed	Stack Overflow, Python Documentation, GitHub	Self	Resolve coding and runtime issues
Guide / Mentor Discussion	Weekly	Google Meet / WhatsApp	Student & Project Guide	Discuss project progress and receive feedback
Documentation Review	Once	Microsoft Word	Self	Verify project documentation before submission
Final Project Submission	Once	Skill Wallet & GitHub	Self	Submit final project and documentation

 Communication Challenges & Resolutions

CHALLENGE FACED	RESOLUTION / ACTION TAKEN
Difficulty integrating the trained crop recommendation model with the Flask application	Verified file paths, loaded model.pkl correctly, and tested predictions locally.
Errors due to missing Python libraries and package dependencies	Installed required packages using pip install -r requirements.txt and verified the environment.
Preparing documentation according to the SmartBridge template	Updated every template section with OptiCrop-specific content, added diagrams, screenshots, and testing results.
