

PROJECT DEMONSTRATION

Project Demo Planning

 **DATE**
17 7/9/2026

 **NAME**
K.Hemanth Kumar

 **PROJECT**
**OptiCrop – Smart
Agricultural
Production
Optimization Engine**

 **MAX MARKS**
1 Marks

Overview

A well-structured demo plan ensures that the project is presented effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities.

Demo Sections

SECTION	DESCRIPTION	DURATION (MINS)	RESPONSIBLE
Introduction	Introduce OptiCrop, explain the objectives, problem statement, and expected outcomes.	2	Self
Solution Overview	Explain the system architecture, workflow, dataset, preprocessing techniques, ML model, and technologies used.	2	Self
Application Demonstration	Launch the Flask application, enter sample soil/climate details, perform a real-time crop recommendation, and show the result.	3	Self
Feature Explanation	Explain implemented features such as input validation, preprocessing, model integration, responsive UI, and the result page.	3	Self
GitHub Repository & Documentation	Demonstrate the GitHub repository structure, source code organization, project documentation, and deployment files.	2	Self
Conclusion & Future Enhancements	Summarize project achievements and discuss future enhancements.	2	Self

Demo Flow Summary

STEP	ACTIVITY	NOTES
1	Introduction & Problem Statement	Explain project objectives and the need for crop recommendation.
2	Solution Overview	Present architecture, workflow, ML model, preprocessing, and Flask integration.
3	Live Feature Demonstration	Demonstrate a crop recommendation with sample soil/climate data.
4	Q&A Session	Answer questions on the model, accuracy, limitations, and future plans.
